PERSONAL PROJECTS

Become a Guardian (08/2023 - 09/2023)
- In the 'Become a Guardian' project, I utilized a combination of HTML, CSS, and JavaScript to create an engaging and interactive web experience. Leveraging Scrolltrigger and Locomotive Scroll, I implemented smooth scrolling animations that dynamically guide users through the content as they explore the information about becoming a guardian. while JavaScript added functionality and interactivity.

cuberto (09/2023 - 10/2023)
- A mesmerizing web design masterpiece brought to life through the harmonious synergy of HTML, CSS, and JavaScript. The utilization of Locomotive Scroll, Scrolltrigger, and intricate animations results in an awe-inspiring user journey. Cuberto's design showcases an exquisite blend of creativity and technical prowess

DYNAMIC INSTAGRAM CLONE (12/2023 - Present)
- The project includes secure user authentication, dynamic profile management, seamless image uploads facilitated by Multer, and a real-time interaction system facilitated by AJAX, allowing users to 'like' posts without page reloads. Database management is optimized with MongoDB and Mongoose.js. Implemented dynamic data handling in the front end using EJS, enhancing the user experience with personalized and dynamically rendered content.
